

Tyvek® Credit Card Sleeves

Also available with RFID Shielding

DuPont™ Tyvek®

graphics

Authorized Master Distributor

Used as a protective sleeve for ATM, debit, and credit cards, a Tyvek® credit card sleeve is a high-impact, low-cost promotional vehicle with true functionality – offering the card holder a convenient and protective sleeve for a frequently used card while giving you repeat recognition of your company's image. Tyvek® sleeves protect the magnetic strip of I.D., credit, ATM and other smart cards from the damage and scratches of daily use.

Credit card sleeves available printed in up to four colors or plain white. Bleeds (printing edge to edge) available.

IDEAL USES:

- Identification card holders for your business, college, etc.
- Promote your products and services
- Put your business card in a Tyvek® sleeve when handing it to a prospect.
- Use it in place of a business card for a differentiating look.
- Provide instructions for care and use of products.

Please note: Camera-ready copy provided for printed orders

Custom-Printed Tyvek® Credit Card Sleeves

2.25" x 3.5" - open end, L-seam style Tyvek sleeves with double thumb cut.

all pricing is per thousand sleeves and includes free shipping within the continental US

PROTECTION AGAINST IDENTITY THEFT AND FRAUD

The Secure Sleeve with Armor Shield™ provides a barrier to the radio frequency signals necessary to communicate with contactless cards. It complements electronic security measures such as encryption and authentication to provide an additional layer of protection against unauthorized or unknown access.

Protects credit cards, drivers' licenses, transit cards, government identification cards, school, hospital, and company identification cards, and all passport cards where a chip is embedded with identity or account information.

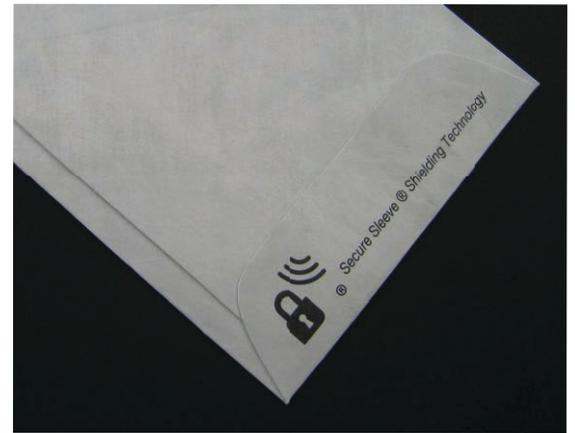

RFID Shielded Sleeves provide shielding for ISO 14443/15693 cards and EPC Gen1/Gen2 contactless smart cards and any contactless card that operates at 13.56 MHz and above, and is FIPS 201 approved by the US Government as an electromagnetically opaque shield.
